Why Theobald Software

THEOBALD SOFTWARE

“Theobald Software makes very affordable solutions for building integrations with SAP, that actually work!”

~ Business Intelligence Product Owner, Global Manufacturing Company

- ## Proven, reliable SAP data and process integration

  Our tools are used by 3,200 SAP customers worldwide with the highest demands for SAP integration. SAP connectivity has been our focus for 15 years and we continuously innovate. SAP is not just a checkbox for us, it is what we live and breathe.

- ## Certified and up-to-date with latest SAP releases

  Our tools work with the latest SAP releases, including HANA-based systems. We also support older releases going back to SAP R/3 4.0 and SAP BW 3.0. All of our products are based on SAP-certified integration technology.

- ## Extension to your solutions

  Our tools are designed to extend the capabilities of what you already have with best-of-breed SAP connectivity. Our tools are intended to work with your existing ETL tool, analytics apps, databases, workflow and collaboration tools.

- ## Quick results at low TCO

  Our tools are priced very competitively and our server license model does not put a limitation on number of SAP extractions / calls, users, or SAP system connections. The tools are easy to install on standard Windows systems and straight-forward to use. Customers typically see results within days, not months.

Next Steps

- Talk to your Knime contact about SAP connectivity
- Free trial, support and guidance
